

SMALL MOLECULE MANUFACTURING

Over 40 years of experience providing high quality APIs and intermediates, from lab scale through pilot to commercial production for pharmaceutical companies throughout the world.

EXPERTISE

High Potency
APIs

Cryogenic & High
Pressure Reactions

High Energy
Chemistries

Biocatalysis

Continuous Flow
Technology

Controlled
Substances (EU)

Complex
Chemistries

Ajinomoto Bio-Pharma Services sites in Europe and Asia offer the capacity and quality for the development and commercial supply of your intermediates and APIs.

SMALL MOLECULE MANUFACTURING

ROBUST DEVELOPMENT & SCALING OF APIs

Multi-purpose
production facilities

Analytical method
development & validation

Scalable process
development & tech transfer

In-process and lot
release testing

Pilot plant
9,000 L capacity

Project and product life
cycle management

CAPACITY OVERVIEW

	Wetteren	Balen	Vizag
Total Capacity	393 m ³	190 m ³	120 m ³
Production Units	18	9	5
Total Reactors	110	50	19
Isolation	SS, HAS filters HAS filter dryers SS, HAS centrifuges		SS filter dryer HC22, Halar coated centrifuges
Drying	10 dryers	7 dryers	3 dryers
Micron-ization	Mill	Delumping	Delumping
Preparative HPLC	150 and 450 mm columns	N/A	N/A
